About the Journal

International Journal of Curriculum and Instructional Studies (IJOCIS) is a peer-reviewed international journal published by Curriculum and Instruction Association (ISSN: 2146-3638). IJOCIS began its publication life by releasing its first issue on 01.06.2011 and now accepts articles focusing on the field of curriculum and instruction. The journal provides a platform for the publication of qualitative and quantitative research related to curriculum and instruction, original opinions, theoretical studies and model recommendations. The main objective of IJOCIS is to be a reliable and reputable source of information on the conceptual and applied scientific research in the field of curriculum and instruction at national and international level.

The Association of Curriculum and Instruction aims at creating a common scientific platform for theoretical and practical research in the field of curriculum and instruction by bringing together all the practitioners working in the field through IJOCIS.

IJOCIS is indexed in Ulakbim, TR Dizin, EBSCO Host, Arastirmax and ASOS Index databases. The required procedures to be indexed in ESCI, ERIC and SSCI at the earliest are currently being carried out. We would like to express our gratitude to everyone who have contributed to the journal as authors and referees and in particular to those who have conducted studies on Curriculum and Instruction. We look forward to your continued support and interest in future.

Editorial Board

**Owner**
Prof. Dr. Özcan Demirel, Cyprus International University, TRNC

**Chief Editor**
Prof. Dr. Kıymet Selvi, Anadolu University, Turkey

**Editors**
Prof. Dr. Cecilia MERCADO, Saint Louis University, Philippines
Assoc. Prof. Dr. Gülşen Ünver, Ege University, Turkey
Prof. Dr. Kerim Gündoğdu, Adnan Menderes University, Turkey

**Technical Editor**
PhD. Serkan Dinçer, Çukurova University, Turkey

**Editorial Assistants**
PhD. A. Selcen Arslangilay, Gazi University, Turkey
MEd. Gülçin Gülmez, Middle East Technical University, Turkey
Assist. Prof. Dr. Melis Yeşilpınar Uyar, Dumlupınar University, Turkey

**Proofreading Editors**
Lec. Bülent Alan, Anadolu University, Turkey
Assoc. Prof. Dr. Cevdet Epcacan, Siirt University, Turkey
Assoc. Prof. Dr. Dilara Demirbulak, Yeditepe University, Turkey

**Editorial Board**
Prof. Dr. Berit Karseth, University of Osloensis, Norway
Prof. Dr. Eero Ropo, Tampere University of Tampere, Finland
Assist. Prof. Dr. Esed Yağcı, Hacettepe University, Turkey
Prof. Dr. Liliana Ezechill, University of Pitesti, Romania
Prof. Dr. Lynn Davies, University of Birmingham, United Kingdom
Prof. Dr. Melek Demirel, Hacettepe University, Turkey
Assist. Prof. Dr. Nevriye Yazçayır, Gazi University, Turkey
Assist. Prof. Dr. Suat Pektaş, Ankara University, Turkey
Prof. Dr. William Doll, Victoria University, Canada
Submission Guideline

International Journal of Curriculum and Instructional Studies (IJOCIS) accepts online submissions through http://www.ijocis.com. All communication during submission process is done via e-mails. We recommend you to check your junk mail during this process in case these e-mails are regarded as junk by your account. Submissions done using other means will not be considered for publication. To contact us, use ijocisjournal@gmail.com.

Publication Process

Submission Preparation

International Journal of Curriculum and Instructional Studies (IJOCIS) publishes papers in both Turkish and English. Authors are required to prepare their papers using the Journal’s template and to submit their papers and the other required files through www.ijocis.com. Submitted files must not include information about the authors, institutions, or organizations. Submitted papers must include both the Turkish version and the English version of the study in a single file. Submissions of the authors of other nations will be evaluated on the English version during the review process and the Turkish version will be required after acceptance.

Submissions go through plagiarism and formatting check. This process lasts approximately a week.

Following formatting check, submissions are passed on the Editor for the first evaluation. Then, the submission is transferred to two-three reviewers. This phase lasts approximately two weeks.

Each reviewer is allocated one month for a submission and is given 15 additional days if requested. If the review is not completed within this time, a new reviewer is appointed for the submission. The review process lasts approximately two months.

Decisions are announced to the authors following the review process. If revisions are advised by the reviewers, authors are given one month to revise their submissions.

Revised submissions are sent to the reviewers for a second check. This step lasts approximately one month.

Upon the reviewers’ final decision, the editors check the submission process and give their final decision on the submission. This step lasts around two weeks.

Accepted submissions go through redaction process first. The submissions are revised on linguistic and stylistic features. This step lasts around one month.

Submissions completing all the publication phases are given DOI numbers and published online upon the consent of the authors.

Publication duration varies between 3 and 12 months.
Before Submission

Author(s) Name(s)

Submissions to International Journal of Curriculum and Instructional Studies (IJOCIS) must include all authors’ names in the correct order. **No author names can be added after submission.** If an exclusion of an author’s name or a change in the order of authors are requested, a written and signed (by all of the authors) request form must be sent.

Conflict of Interest

Authors hold the full responsibility for submitted manuscripts to International Journal of Curriculum and Instructional Studies (IJOCIS). If there is a conflict of interest with other person(s), organization(s), or institution(s), this should be stated before evaluation process is started.

Submission Declaration

Manuscripts submitted to International Journal of Curriculum and Instructional Studies (IJOCIS) must be original and have not been fully or partly published before. All submissions go through plagiarism/uniformity control process in multiple software. It should be noted that uniformity with the author(s) previous work is also considered plagiarism. Submissions with plagiarist acts are rejected and are not accepted again.

Copyright

Author(s) must accept that the content, the findings, and the conclusions of the submitted manuscripts does not bind the Owner, the Editor, the Assistant Editor, Editorial Board Members, or Scientific Committee Members of International Journal of Curriculum and Instructional Studies (IJOCIS).

Author(s) must declare that the submitted manuscripts to International Journal of Curriculum and Instructional Studies (IJOCIS) are original and have not been published previously or are under consideration of publication elsewhere.

Author(s) must confirm that EPODER as the owner of International Journal of Curriculum and Instructional Studies (IJOCIS) retains all the copyrights unconditionally and indefinitely to distribute the articles published by International Journal of Curriculum and Instructional Studies (IJOCIS) due course of Intellectual Property Law, Article 22, Act 5846; to share publicly due course of Article 23; and to hold full rights of communication related to the published article anytime, anywhere and via any means due course of Article 25 of Intellectual Property Law.
**Publication Ethics**

An article must be prepared and submitted in full compliance with not only national and international laws of ethics but also must respect common standards of ethics accepted by academicians. Therefore, all parties carry the responsibility for respecting principles of ethical standards.

**Author Responsibilities**

- Articles submitted to International Journal of Curriculum and Instructional Studies (IJOCIS) must be original. Citations from other sources must be clearly stated.
- The names of the individuals who do not contribute to the study must not be included among authors.
- If there is a conflict of interest regarding the study, the process under Conflict of Interest must be followed.
- Raw data can be requested during the review process. In such a case, authors are asked to provide their raw data as soon as possible.
- Authors are responsible to obtained permissions from related individuals, organizations, etc. If necessary.
- A manuscript cannot be sent to more than one journal at a time for evaluation.
- No author names can be added after submission. Go to Author(s) Name(s) for detailed information.
- Author(s) must not contact persons involved in evaluation process during submission evaluation.

**Ethical Appropriateness Checklist**

- If you have used data, tools, or procedures from previously published sources, have you obtained necessary permissions from persons or institutions that can claim copyright?
- Have you cited the information from other published sources appropriately?
- Have you obtained official permissions for data collection/use, etc.?
- Have you obtained consent letters from your participants or can you provide answers to the questions from the Editor regarding this issue?
- If you have used animals in your study, have you applied the procedures within appropriate limits?
- Have you taken necessary precautions to maintain the confidentiality and safety of the participants or other parties participated in your study?
- If there are more than one author, has each author read and agreed on the content of the submitted version?
- If there are more than one author, has each author agreed on the order of names in the submitted version?
- If you have used copyrighted materials, have you received copyright permissions?
Editor’s Responsibilities

- Contributing to and facilitate the evaluation process.
- Appointing unbiased and double-blind reviewers.
- Maintaining and managing a smooth and fast evaluation process.
- Storing all records.
- Supporting freedom of thought.
- Being objective.
- Managing the evaluation and publication process standing on intellectual property rights and ethical standards.
- Taking responsibility in controversial or conflicting cases.

Reviewer’s Responsibilities

- Reviewers should agree to review submissions only relevant to their specific fields.
- Reviewers should not access to information about author(s) identity. In case of accessing or receiving such information, evaluation process must be ended.
- The evaluation process should be completed in total objectivity and confidentiality.
- If reviewers believe that there is a conflict of interest, they should reject to evaluate the manuscript and inform the Editor on the issue.
- Reviewers can use the content of the manuscripts they evaluate only after acceptance. They cannot use any information from the manuscripts rejected for publication.
- Reviewers should point out relevant published work which is not yet cited.
- Evaluation process must be completed objectively on the content of the manuscript. Personal characteristics such as nationality, gender, religion, political views, or commercial conflicts must not interfere with the reviewers’ decisions.
- Reviewers should have a constructive and polite attitude towards submitted work. They should avoid degrading or offensive language in communication with authors.
- Reviewers should comply with evaluation deadlines and responsibilities.

Publisher’s Responsibilities

- Editors are fully responsible for publication processes. Because editors hold the responsibility of decisions on the submissions and published articles, the Publisher declares and guarantees free editor decisions to be maintained.
- The Publisher holds the right of property and copyright of each published work and has the responsibility to keep a copy.
- The Publisher has the responsibility to take all the precautions to avoid scientific exploitation, plagiarism crimes against the Editor.
Protecting the Reliability of Scientific Work

Ethical considerations in reporting research results: A sound scientific method is based on reproducibility and verifiability. Data, including visual materials, cannot be manipulated, changed, or reduced in order to verify research hypotheses or to obtain desirable results.

In case there is a mistake in the published version of an article, the author(s) must announce the mistake(s) to the audience. When such a mistake is recognized by the author(s), the Editor is informed for correction. Each corrected version and the corrections made are announced to the audience on the Journal’s website.

Data storage and sharing: In case the reliability of the submitted research is questioned, author(s) are responsible to provide the data used to the Editor. If authors fail to provide their data, the submission is rejected and is not accepted for evaluation again. Authors are required to store the data, applications procedures, and other materials utilized in their submissions for at least 5 years. After publication, if other researchers or authors request, data can be shared. Before sharing data, information, codes, or symbols about participants’/subjects’ identities must be deleted. If a study is funded by an institution, the rights of the institution must be protected and relevant acknowledgement must be added. If authors desire to share data, there must be a signed letter of agreement between the author(s) and the owner(s) of the data regarding the aim(s), the method(s), the scope, the conditions, and the limits for the use of the data.

Re-publishing part of or full Data: Re-publishing data refers to when findings from an accepted paper are re-used in another publication as if original. Re-publishing is an act of violation of copyright and related regulations because an author cannot give copyright permission for the same work to more than one entity. The full length or part of a previously published work cannot be published again or cited over the appropriate limits. A previously published work or one with significantly similar scope cannot be submitted for publication again. Papers presented in conferences but not published in conference proceedings can be submitted for publication by stating the conference presented at in a footnote. Papers which have been presented and published in conference proceedings cannot be submitted for publication.

In case authors wish their work to reach other audience, the following conditions must be met to re-publish the results:

- The re-published version must be considerably shorter than the original one.
- A notification that the work has been previously published and relevant referencing must be clearly given in a footnote.
- If the tables, graphs, or other visuals that have been used in the previously published version are used in re-publication, this must be clearly stated and referenced in a footnote.
- The original work must be properly added to the references list.

Findings should be presented in unity and should not be presented in only some parts. Publishing multiple studies each of which cover a part of the same bulk of findings can be misleading. However, in cases where research has a wider scope, conducted during long periods, or has interdisciplinary focus, multiple studies based on the same data source can be published. When studies have interdisciplinary nature, publishing findings on one source may not be sufficient. If studies are conducted in a long period, findings obtained in different phases of this period can contribute to the field, and thus these can be published provided the phase is stated. In this case, the research based on previous phases needs to be cited. If a study conducted in long period is published following the studies based on the findings from previous phases, repeating the same findings should be avoided and quotes from such previous work should be cited.
The Editor should be notified when multiple studies based on the same research are submitted for evaluation. The editor decides whether the secondary studies meet the publication requirements.

Global or Self Plagiarism: Authors cannot use other researchers’ opinions or thoughts as their own. Similarly, authors cannot use thoughts, opinions, and parts of research from their own previous work without citing properly.

Protection of Participants’ Rights and Interests

Confidentiality of the information obtained from participants should be maintained. Therefore, submitted work must not include information about participants’ identity. Participants should agree to be involved in research and when there is a hierarchical relationship between the researcher and the participants (e.g., teacher-student, director-teacher, etc.), researchers must not pressure participants to give consent. Particularly, in case an academician perceives his or her students as “potential subjects”, this would lead to misleading or subjective data resulting from reluctant responses from students and to violating participants’ rights and interests. Therefore, a special care should be given not to force students to participate.

If a study is based on the evaluation of a product or a service, the author(s) must not have a conflict of interest or a commercial benefit with the institution or the organization. In case there is a conflict of interest or such a potential, this should be indicated in the study as a limitation even if it is thought not to influence objectivity of the results.

Protection of Intellectual Copyright

Authorship right is gained by contributing considerably to research and by taking the responsibility of a published work. Considerable contribution may refer to: formulizing research problems or hypotheses, developing research design or application procedures, conducting statistical analyses, interpreting results of analyses, or writing part of a study. Individuals contributing to such processes are listed among the authors of the study. Individuals who contribute to a study other than mentioned means are cited in footnotes explaining their contributions. These contributors can help research by helping to create data collection tools, giving advice on data analysis methods, helping in data collection process, assisting to reach participants, or conducting routine observations.

In order to determine the order of authors in author list, each author is evaluated based on his or her contributions to the study and the one who has contributed most is written at the top of the list. When the contributions of the authors are thought to be equal, the list is done in alphabetical order and a note explaining the order of the list is added. Organizational or professional status or titles are not considered as a factor in deciding on the order of author list.

According to Article 35 of Intellectual and Arts Copyright Act Number 5846 (and Act number 4630 that changed it), any type of information taken from other sources must be cited and referenced. Act Number 4630 states that:

“Article 35 – Other sources can be quoted in the following cases:

1 Quoting sentences or parts from publicly known work in a scientific or literary work;
2 Including themes, patterns, passages, or parts from its characteristics of a previously published musical composition into musical work;
3 Including acceptable portions of publicly known work of art or other published work in a scientific work in a way that the included part or the whole is clarified and its content is explained;
4 Including acceptable portions of publicly known work of art in scientific conferences or lessons and using projections to show in order to talk about or explain the work.

Quotes or integrations must be made clear. The parts of the work quoted or integrated must be clearly and properly cited.

In case the limits explained in the Act are violated, the act is considered as a crime and imposes punishment regulated in Article 71 of Act Number 4630:

“**Article 71** - (Changed Article: 01/11/1983 -2936/Article 11; Changed Article: 23/01/2008-5728 S.K./ Article 138)

Violating intellectual and art work moral, commercial or relevant rights protected under this Article:

1 Individuals using, reproducing, changing, distributing, broadcasting using any audio or visual means, publishing, or selling illegally produced copies, lending, renting, purchasing for commercial purposes, importing or exporting, keeping for non-personal needs, or storing a work of art, a performance, a phonogram, or a production without obtaining legal permission from its owner are sentenced to imprisonment between 1 and 5 years and are fined.

2 Individuals giving their names to the work of others are sentenced between 6 months and 2 years and are fined. If this act is followed by distributing or publishing the work, upper limit of imprisonment is 5 years and no fine is applied.

3 Individuals discussing the content of others’ work publicly without obtaining legal permission are sentenced up to 6 months imprisonment.

4 Individuals citing other work wrongly, insufficiently or misleadingly are sentenced up to 6 months imprisonment.

5 Individuals reproducing, distributing, or publishing others’ work, performances, phonograms, or products using other well-known individuals’ names are sentenced to imprisonment between 3 months and 1 year and are fined.

Individuals who commit crimes stated in Paragraph 1 of the Additional Article 4 of this Act and individuals who provide content information and continue to commit the crimes mentioned are sentenced to imprisonment between 3 months and 1 year in case there are no other reasons for harsher penalties.

If individuals who sell or buy illegally reproduced, distributed, or published others’ work, performances, phonograms, or products reports the names of people from whom they have obtained the work before prosecution process may receive remission or may not be sentenced at all.”
Submission Preparation

Template

International Journal of Curriculum and Instructional Studies (IJOCIS) publishes articles in Turkish and English. Authors are required to prepare their submission following the steps in the journal’s web site and submit the files prepared using the template. Information about authors, institutions, or organizations should not be included in the submission manuscript. **Submissions should be done in a single file for both Turkish and English versions.** Submissions of the authors of other nations will be evaluated on English version during the review process and Turkish version will be required after acceptance.

Word Limit

Maximum word count is no more than 7500 words (except list of references).

Abstract

An abstract should be between 150 and 250 words. Statistical procedures and references should not be included in the abstract if not essential.

Key Words

3 to 5 key words should be added. The key words should not be too general or too specific and should not exceed 3 words each.

Headings

Detailed information about headings is given in the template. Headings should not be numbered and should follow a similar pattern as shown in the template.

Symbols

Submission files should be sent in Ms Word 2010 and later, necessary symbols should be added using add symbol command not as pictures.

Tables

Table formatting is shown in the template. When referring to tables, use “Table 1/Table 2, etc.” instead of using expressions such as “the table below/above, etc.”.
Figures

Figure formatting is shown in the template. When referring to figures, use “Figure 1/Graph 2, etc.” instead of using expressions such as “the figure below/above, etc.”. Pictures should be at least at 300 dpi resolution.

Numbers

Numbers between 0-1 should be in text format within text (except for findings). Numbers should also be avoided at the beginning of sentences and text form should be used (in text. Eleventh century... etc.). Numeric data should be given in decimals both in text and in tables, figures, etc. (e.g., 11.25, 24.00). Whole numbers should be given using double zero (e.g., 12.00) and divisions for all numbers should be given using full stop.

Acknowledgements

Acknowledgements should be added after acceptance and placed right before References. This part should not be included in the submission version before acceptance.

References

Referencing format for both Turkish and English versions of the manuscript should be APA 6th edition. Detailed information is shown in referencing template.
Revision upon Reviewers’ Feedback

Reviewers’ feedback is immediately sent to author(s). Authors are required to complete the suggested changes in 1 month. When such changes are done, authors are required to give detailed information about the suggestions by the reviewers and the subsequent changes they have made on the first page of the revised manuscript file.

Authors need to write their objections to the corrections requested by reviewers in red.

After Acceptance

Redaction

All accepted manuscripts to be published in International Journal of Curriculum and Instructional Studies (IJOCIS) go through redaction edit process (both Turkish and English version). Therefore, submissions are transferred to Redaction Unit following acceptance. Manuscripts are sent back for confirmation to author(s) after redaction process.

Page-setting

Following redaction process, manuscripts are transferred to page-setting unit. When this phase is completed, manuscripts are sent to author(s) for final confirmation. Upon confirmation, the paper is given a DOI number and is published online on the website.
